

PLANTS

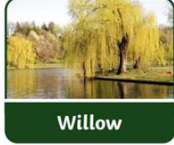

Parts of a plant

Types of trees

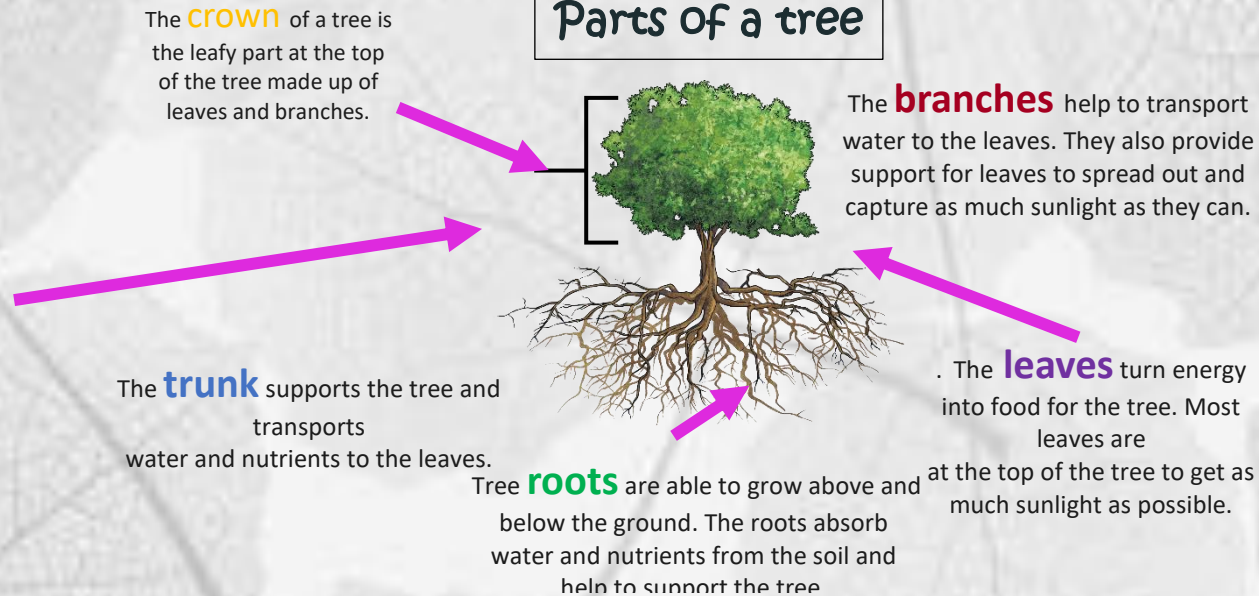

Trees are **types of plants** too.

Evergreen An evergreen tree keeps its green leaves all year round, even in the winter.	 Yew	 Holly
Deciduous A deciduous tree loses its leaves each year. They grow back again.	 Willow	 Ash

Types of plants

Wild plants - A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.	 dandelion	 daisy
Garden Plants - are plants that people choose to grow in their gardens.	 pansy	 sweet pea

Year 1 Science Seasons

Daylight hours each month:

Month	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	July	Aug
Hours of Daylight	13	11	9	8	8	10	12	14	15	16	16	14

Autumn

Autumn is usually in the months **September, October and November**. In autumn the amount of time it is light becomes less which means it gets **darker earlier**. The leaves start to **change colour** and **fall off the trees**.

Winter

Winter is usually in the months **December, January and February**. In winter we have colder weather, **sometimes snow** and frost. The trees have no leaves and the amount of time it is light during the **day is at its shortest**.

Spring

Spring is usually in the months **March, April and May**. In spring the days start to get longer and a bit warmer. New plants grow and the **trees grow their leaves back**. Many animals **have babies** such as birds, cows, sheep and ducks.

Each year we experience these four seasons.

The seasons are caused because the **Earth is spinning on a tilt**.

Summer

Summer is usually in the months **June, July and August**. In summer the **days are at their longest** and the **weather is the warmest**. The trees are **full of leaves**.
