

Y2 Science - Plants

sunlight	Plants need sunlight to grow well, some need a lot, some not so much.
water	All seeds and bulbs need water to germinate.
temperature	How warm or cool something is.
nutrition	Food - plants make their own food using sunlight.
germination	When everything is right the new plant will burst out of it's shell.
shoot	The plant above the ground
root	Keeps the plant in the ground
seed	New plants grow from seeds and then they produce new seeds
bulb	Usually larger than a seed, but also grows into a new plant

We eat some plants - fruit and vegetables are plants that we eat. Herbs are plants too.

Alan Titchmarsh is a Botanist and a Gardener.

What do plants need?

Plants need things in order to grow and be healthy.

- They need water.
- They need sunlight.
- They need to be kept at a suitable temperature.
